— SIDE PROJECTS

AAABAO: AI Expense Tracker App Web App

2026

- **Project:** Designed and built "AAABAO", a smart bill-splitting app. Owned the 0-to-1 process from needs to UI/UX and full-stack dev using AI Agents.
- **Core Highlights & Product Features:**
 - **AI-Driven Dev:** Used standard prompts and AI agent skills to direct the AI, covering the work of a full team on my own to build complex logic and UI.
 - **Spec Scope Control:** Wrote clear specs to define the MVP before asking AI to code, keeping AI output on target without wasted work.
 - **Smart Debt Split:** Solved the pain of messy group trips. Built a **multi-currency "Debt Matrix"** that turns complex group debts into one simple number to settle, and syncs records for all members.
 - **AI UX:** Added **voice** and **receipt-scan** entry using AI to cut typing effort, with a cross-check step to catch AI amount errors.
 - **Tech Trade-offs:** Chose PWA and Serverless (Vercel + Google Cloud Run) for fast launch, low cost, and no App Store wait time.

— EDUCATION

- **Dept. of Mechanical and Computer-Aided Engineering (Attended)** | Feng Chia University (2010/09 - 2012/02)
 - **Experience:** Founder of Board Game Club
